

SUTTC 2014 Call for papers

The Society for Underwater Technology (SUT, sut.org.uk) is a multidisciplinary learned society that brings together organisations and individuals with a common interest in underwater technology, ocean science and offshore engineering. On behalf of the Organising and Technical Committees of the 2014 Society for Underwater Technology Technical Conference (SUTTC 2014), we have the honor and pleasure to invite you to attend the conference, which will be held in Qingdao, China, 13-15 October 2014.

SUT is the most influential underwater engineering academic organisation in the world, established in 1966, with the headquarters in London. SUTTC has been successfully held twice in China, which builds a free exchange and co-operation platform for experts and scholars in underwater technology.

This is the third time of the SUTTC held in China; it is hosted by SUT China and China University of Petroleum, Beijing, and also endorsed by Qingdao Virgin Technologies, China Petrochemical Research Institute of Petroleum Engineering, Chinese Society of Mechanics, and Chinese Society for Ocean Engineering, etc.

The subjective of the conference is “Ocean energy”. The topics are as follows:

- 1 The related technologies for subsea oil and gas production system
 - Development model and engineering design for subsea production system
 - Key equipment design and manufacturing technology for subsea production system
 - Testing technology for subsea production system
- 2 The related technologies for new ocean energy
 - Offshore wind power generation technology
 - New technology for tidal power station equipment design and manufacture
 - Development feasibility and technology for ocean combustible ice
- 3 The related technologies for subsea exploration
 - ROV
 - Exploration technologies for subsea mineral resources
 - New technology of subsea oil and gas resources exploration
- 4 Safety and environmental protection
 - Emergency maintenance and repair technologies in the field of Marine energy engineering
 - Environmental protection technologies of ocean energy development
- 5 Others
 - International exchanges and co-operation for ocean energy development
 - Marine energy development strategy and countermeasure of China

To ensure the academic quality of the meeting, and attract more high-level academic, we call for papers from the global world. All of the submitted articles will go through rigorous by 2-3 technical experts. All accepted papers will be published in the Proceedings of SUTTC 2014 (published by the Petroleum Industry), and the excellent papers will be recommend to a journal of “China Ocean Engineering”, “Underwater Technology”, “Development and Application of Oceanic Engineering”.

Paper publication: Please submit your papers by email attachments to chinasuttc@gmail.com. All papers should be no more than six pages in length and must be written in strict accordance with the format (see the information on the website).

Important Dates:

15 June: Abstract Submission	30 June: Abstract Acceptance
30 July: Manuscript for Review	15 August: Final Manuscript due

Warm welcome experts and scholars gathered in Qingdao.
For more information you can visit the conference web at: www.sutchina.org
