### "Increasing Value while Controlling Cost through Industry Collaboration"

## CALL FOR ABSTRACTS

[Click to Submit your abstract today!](#)

The technical program of MCE Deepwater Development engages key members of the deepwater oil and gas community by providing a stage for world-class technical discussions focusing on the technology, innovation and experience paving the way to realizing a future of increasing demand. The technical program works together with the focused exhibition and valuable networking opportunities to create an environment conducive to better understanding the long-term vision of the global deepwater industry.

The Call for Participation is open through October, 2014 and we encourage you to visit [www.mcedd.com](http://www.mcedd.com) for additional information about technical topics and to submit your abstract.

**BP and SUT** support and sponsor the ongoing **Early Career Engineer Program** within the technical program. We encourage the young engineer (seven years or less of industry experience) in your company to submit an abstract and use the experience to share what they are working on to open up future opportunities for the deepwater market.

**Early Career Engineer Program**

- Open to those with 7 years or less oil & gas experience
- Accepted presentations highlighted within the full technical program
- Awards for Best ECE Presentation

In addition to our standard technical topics, our distinguished Advisory Board has highlighted the following topics to include in this year's program:

<b>Industry Collaboration</b> <ul style="list-style-type: none"><li>• Joint Industry Partnerships</li><li>• Frame Agreements</li><li>• Accelerated Technology Development</li><li>• Lessons Learned</li></ul>	<b>Increased Efficiencies</b> <ul style="list-style-type: none"><li>• Deepwater Drilling</li><li>• Operator-Supply Chain Relationships</li><li>• Development Stages and Strategies</li></ul>
<b>Equipment Standardization</b> <ul style="list-style-type: none"><li>• Subsea Standardization</li><li>• Whole System Standardization</li><li>• Challenges &amp; Opportunities</li></ul>	<b>Contractual Risk</b> <ul style="list-style-type: none"><li>• Risk Assessment &amp; Mitigation</li><li>• Risk Assignment</li><li>• How to avoid this being a development road block?</li></ul>
<b>Early Stage Gate Efficiency</b> <ul style="list-style-type: none"><li>• Getting it Right at Concept Select</li><li>• Future Opportunities</li><li>• Lessons Learned</li></ul>	<b>Life of Field</b> <ul style="list-style-type: none"><li>• Field Extension Strategies</li><li>• IOR/EOR</li><li>• Subsea Processing</li></ul>

#### Additional Information:

- Abstracts must not be commercial in nature
- No technical paper is required if accepted into the program (only a MS PowerPoint presentation)
- Free event admission to the speaker
- We do not charge to participate

### Announcing the Theme for MCE Deepwater Development 2015

MCE Deepwater Development 2015 will be held at ExCeL in London, 24-26 March 2015. The Advisory Board met in August to discuss focused technical session topics as well as determine the theme for 2015: **Increasing Value While Controlling Cost Through Industry Collaboration.**

The technical program is already gearing up, and in keeping with the theme, Shell and ONGC will present 2 of our keynote presentations for MCEDD 2015:

- Martijn Dekker, VP Appraisal and Hydrocarbon Maturation, **Shell**, "Management of Deepwater Developments in the Front-End"
- Sunil Kumar, Chief Engineer - Production, Oil & Natural Gas Corporation Ltd., "Managing Environment - A Contractual Challenge in Subsea Projects"

As a leading deepwater event, MCE Deepwater Development brings a high-level, focused technical program discussing the opportunities and challenges faced by our industry to meet the future demand for energy.

MCEDD has evolved over more than a decade with the help of our Advisory Board and participants to provide leading technical content with business-advancing networking events in a niche environment. By virtue of our operator-heavy technical program, we ensure the content is relevant to today's market conditions.
