MUSEUM

The Underwater World of Science and Technology

Thursday, 4 December 2014

Free programme of career presentations for KS4 and Post-16
At the National Maritime Museum, Greenwich

Did you know?

The oceans cover over 70% of our planet. We are all dependent on them for food, transport and vital resources. They affect our weather and even our future as a species. Yet most of us are unaware of the cutting-edge developments in underwater technology, or the science it is based on, largely because it is hidden from view.

Learn about the fascinating and fulfilling career choices that exist in the marine sector, where you can make a difference in solving energy shortages, moving towards greener living, sustainable fisheries and adapting to climate change.

Aims of the day

This free careers event will enable KS4 and post-16 students to explore a wide range of 'extreme' and varied underwater **careers opportunities** in Britain.

Programme 10.30 – 13.00

The timetable will comprise of presentations by industry experts from a range of underwater science and technology backgrounds.

Subjects include:

- The ocean and its effect on mankind
- Underwater vehicles and robotics
- Renewable energy from our seas
- Animals of the sea
- The marine environment
- Deepwater oil and gas production

Places are limited.
