

An Introduction to Materials & Corrosion

An Awareness Course

2nd & 3rd November 2016

**Cliftons—Parmelia House,
191 St Georges Tce, Perth**

This two-day course has been specifically designed for people new to subsea or unfamiliar with the various corrosion considerations which need to be applied during design, construction and operation of subsea assets.

The aim of this course is to provide an overview of the various materials and corrosion issues which are applicable to subsea structures. The choices made which impact one area of corrosion and integrity will often impact the choices in other areas, and also affect the long term inspection and monitoring which may be required to ensure the design life is met. Having a general overview of the interaction between the various factors and the impact that certain choices make and the equipment used in inspecting and monitoring the structures will provide attendees with a broad knowledge on the interaction which needs to be considered in any installation.

The course will be presented by experienced personnel from both the supply and subsea industries. Most of the course will be held in a classroom environment, with the session being interactive, with every opportunity to ask questions and discuss the material presented as well as a couple of site visits to relevant facilities.

PROGRAMME:

DAY ONE

08:45 Registration and Coffee

09:00 Introduction - TBC, Wood Group Kenny

Grahame will introduce the course by providing an overview of corrosion issues affecting subsea structures and setting the scene for the presentations to follow. He will cover the basic operating conditions for equipment (both internally and externally), basic design requirements and design considerations including costs etc. He will introduce the basic mechanisms of corrosion, and discuss the effects of elevated temperatures, CO₂, H₂S, sand, seabed topography and choice of material etc, on the rate of corrosion. To assist with the learning experience, Grahame will also outline a series of questions that the attendee should be able to answer at the end of the 2 day course.

09:45 Corrosion & Erosion Modelling Chris Selman, Wood Group Kenny

Chris will discuss the various models which are available to model the effects of CO₂, H₂S and sand production on the internals of pipelines. He will compare the models, the information required for input and the advantages/disadvantages/limitations of each. These models are used to determine the corrosion allowance and the requirement for more exotic (corrosion resistant) pipeline materials in certain applications.

11:15 Coffee / Tea

11:30 Chemical Selection, Injection & Inhibition Steven Davoren, NALCO Champion

This presentation will discuss the types of inhibitors which are available for application into oil & gas subsea production systems. Topics will include selection and qualification of inhibitors for systems utilising subsea injection via chemical umbilicals and systems utilising continuous MEG for hydrate control. Other challenges such as top of line corrosion management and downstream process impacts for using corrosion inhibitors will also be provided.

13:00 Lunch

13:45 Specification, Fabrication & Welding Niekie Jooste, The WeldNet

Niekie will cover the materials used in subsea installations and the issues related to welding them together. The types of welds, heat treatment, metallurgy of the welds, limitations imposed on welding offshore pipelines (on barges etc) and testing welds. The difference between fabrication for subsea and topsides applications will also be explored.

15:15 Coffee / Tea

15:30 Cathodic Protection & Coatings John Grapiglia, CCE

John will cover the codes and standards which are used in the design of cathodic protection systems, the important factors which affect the performance of CP systems and a general overview on the issues related to CP and the interaction with coating systems.

17:00 Day End

17:30 Course Dinner - Venue advised within joining instructions

DAY TWO

08:30 Operational Integrity & FFS Colin Radici, Rosen

Colin will discuss pipeline pigging, codes and standards for defect assessment, types of pigs available, their benefits, the type of data which can be collected and limitations affecting intelligent pigging, and pipeline design. It will include how the data is processed and what information is available from the intelligent pigging of pipelines.

10:00 Coffee / Tea

10:15 Planning and Implementation of Inspection & Monitoring Diede Rick Naude, Applus Rtd

Rick's presentation will cover the issues which affect subsea structures and the type of inspection which are performed. It will include ROV inspections, ROV types, tooling, ROV capabilities and regulatory requirements for inspections. The data ideally required to be made available to the inspection company to thoroughly perform the inspections will be discussed as well as other testing/inspection which may be performed by other forms of inspection (such as divers etc).

11:45 Lunch

12:30 Depart Venue for GE Oil & Gas—Jandakot Service Facility Site Visit (Lead by Duncan Wilmot, GE Oil & Gas)

GE's presentation will provide an overview of materials selection and corrosion control for oil and gas production equipment operating in a subsea environment. It will include a guided tour of the GE subsea service facility with the opportunity to view various items of subsea production Equipment.

15:15 (approximate) Depart GE for Curtin University—Laboratory Site Visit (Lead by Brian Kinsella, Curtin University)

Delegates will visit the Corrosion Centre for Education Research and Technology (Corr-CERT) to develop an understanding of what exactly can be tested in this well-equipped facility.

17:45 (approximate) Arrive back at Course Venue / Certification and Course Conclusion

SUT reserves the right to change/amend the programme as it sees fit.

SUT would like to thank the following companies for their support of this course.

Registration Information

Introduction to Materials & Corrosion Nov 2016

Should you require further information on this event, please contact Jennifer Maninin j.maninin@sut.org Tel: + 61 (8) 9481 0999
To register please e-mail completed registration form to perthevents@sut.org

Registration Fees

SUT Members Early Bird (register and pay before 5th Oct) \$858.18 + GST = \$944.00
SUT Members (registration after 5th Oct) \$1072.73 + GST = \$1,180.00
Non Members Early Bird (register and pay before 5th Oct) \$1018.18 + GST = \$1,120.00
Non Members (registration after 5th Oct) \$1272.73 + GST = \$1,400.00

Fee includes - All refreshments during the course including dinner on the first night, an electronic copy of the available presentations and videos are provided and transport to the site visit.

Not included - Hard copy presentations are not provided. Should these be required there is an additional fee of \$80.

Preferred Payment Methods:

Credit Card: Visa, Mastercard or AMEX only *. We cannot accept payment by any other card.

* Payment by Visa or MasterCard will carry a 1.5% surcharge / AMEX will carry a 2.75% surcharge.

Invoice: Please tick here to be invoiced ☐

Joining Instructions:

Joining instructions will be e-mailed to the registered delegate (as shown on the registration form). All details of presenters and updates to the programme will be included in the joining instructions. Please bring along a laptop to view the presentations.

Course Dinner:

An informal dinner will be held in a local restaurant on the first night of the course (details with joining instructions).

Transport During the Course:

Delegates are responsible for their own travel arrangements at the beginning and end of each day. Transport will be arranged by the SUT from the course venue for site visits.

Cancellations: Refunds will be made on written cancellation received up to ten working days prior to the event, but will be subject to a 15% administration charge. Cancellations received 9–4 working days prior to the event will be charged a 50% cancellation fee. Cancellations received 3–0 working days prior to the event will not be refunded. Delegates may wish to nominate a substitute in their place at no charge.

CPD Hours: CPD hours can be claimed for this course, please keep flyer and receipt for auditing purposes.

Please tick box if you do not wish to receive further SUT information ☐

Registration Form

Please e-mail completed form to perthevents@sut.org

Please tick to indicate your preferred payment method:

SUT Member No. _____

Credit Card _____ (Visa, MasterCard or AMEX only)*

Invoice (PO No.)

Name _____ Please tick here if personally funding course ☐

Company _____

Address _____

Email address _____ Tel No. _____

Credit Card No: VISA , MASTER CARD or AMEX * _____/_____/_____/_____

Exp. _____ / _____ Security no _____ (3 digit number for visa & m/c, 4 digit number for amex)

Name on the card _____

Billing Address if not as above _____

E-mail address where receipt to be sent for credit card payment _____

Amount to be charged \$ _____ Signature _____
