

Site Visit - JFD Australia

Friday, 22nd April 2016

JFD, 54 Bushland Ridge, Bibra Lake, WA, 6163

To register for this FREE event visit www.trybooking.com/KMLV

The Australian Industry and Defence Network WA kindly invite SUT members to join them in attending a complimentary, guided tour of JFD thanks to JFD Australia.

About JFD:

JFD is a world leader in the design, manufacture and operation of diving and underwater systems. They provide their defence customers with complete submarine escape, rescue and abandonment solutions and for their special operations and to their MCM customers they offer an extensive portfolio of breathing apparatus and a range of advanced swimmer delivery vehicles. Commercial customers in offshore and diving industries rely on their equipment to protect personnel operating in deep and hostile conditions. The JFD pedigree stems from over 30 years operating safely in the challenging subsea environment.

In Australia, JFD provides direct support to submariners through the ready availability and deployment of a full submarine rescue suite in the event of a submarine incident, as well as the provision of pressurised submarine escape training which is a unique and rare capability within contemporary navies. Given their undersea heritage as a business, they also provide maintenance services to the ADF's diving and mine counter measure forces, and of course deliver products and product support to their commercial subsea clients. While small in the number of employees, JFD in Australia shoulders a serious and significant responsibility in the safety of operations in the environmentally demanding sphere of undersea operations.
