

# NASA in Aberdeen Inspiring the Next Generation

Multi-million dollar Hollywood production, Gravity, is one of the most successful sci-fi movies of all time. But just how much of the film's plot was true to life?

---

Come along to **The Truth Behind Gravity** at Robert Gordon's College, to hear from NASA Astronaut, Rick Hieb, and NASA Scientist, Dr. Sue Lederer, who will give their experience and knowledge of zero gravity and how it affects us.

Dissecting the movies effects, Rick and Dr. Lederer will explore the sensationalized segments which bend the laws of physics, and show videos taken in the actual International Space Station and in space with play-by-play explanations of what it's really like to 'float in space'.

**Venue:** MacRobert Hall,  
Robert Gordon's College,  
Schoolhill, Aberdeen  
AB10 1FE

**Date:** Friday 3 March 2017

**Time:** 7.00 – 8.30pm

**Price:** £3

Buy your tickets by phone through Aberdeen Box Office on 01224 641122 (Mon - Sat, 9.30am - 6pm), online at [aberdeenperformingarts.com](http://aberdeenperformingarts.com) or in person at Aberdeen Box Office.
