CHRIS LAWLOR SCHOLARSHIP \$7500

This scholarship is awarded to the most outstanding candidate. In addition to the scholarship, they will receive networking opportunities and attendance at a SUT short course.

GABRIELLE CUMMINS
2022 Chris Lawlor
Scholarship Winner

Gabrielle's research reviews ocean ecosystem accounting and investigates benthic habitat and fish assemblages around offshore subsea structures.

DIGITAL AUTOMATION IN ENGINEERING SCHOLARSHIP \$5000

The scholarship is awarded to an applicant who has shown initiative during their studies, by applying programming skills to complement, automate and improve their subsea analysis and design work, and aspires to work in the sub-sea industry. This scholarship is funded by

SAMANTHA HOEKSTRA
2022 Digital Automation in
Engineering Scholarship Winner

Passionate undergraduate Ocean Engineer at the Australian Maritime College working on integrating power prediction methods for the M4 Wave Power demonstration project.

MARINE RENEWABLE ENERGY SCHOLARSHIP \$5000

The scholarship is awarded to the applicant with the most potential to make a significant contribution to the development of marine renewable energy through their studies, research or career ambitions.

This scholarship is funded by

CHRISTINE LYNGGARD HANSEN
2022 Marine Renewable
Energy Scholarship Winner

Christine's research aims to accurately estimate the design wave – the biggest wave that a structure should withstand – for floating offshore renewable structures.
