- 1 x complimentary registration to attend every Industry Mentoring Program events (5 events total)

2019 Mentoring Program

2019 Program Snapshot:

- **Eight industry societies**
- More than **50** mentors; **80** mentees
- **8 events:** focus on networking, communication and leadership skills

2019 Feedback:

“Being paired with a Mentee from a different society and specialism was great”

“The opportunity to do some mentoring is obviously central and key to the program, but the ongoing sessions are very good and can provide some material to discuss between mentors/mentees”

“Networking opportunity and good speakers presenting stimulating topics for discussion.”

“I liked that the pairings were arranged for us and that it wasn't designed to be a 'technical development' mentor. I appreciated that the program understand that you can learn form others in industry even though they don't fall into the same technical discipline as each other. Also, 90% of the workshops were absolutely amazing!”

“My mentor (small business owner) really helped me to strategically improve my company (analogous small business). My mentee helped me see things from a new perspective which I found beneficial too.”
