

North of England Evening Meeting Marine Energy Industry 20th November 2019

Registration & Refreshments 6.00pm - Presentations 6.30pm
Newcastle University, Armstrong Building, Room ARMB1.49,
Newcastle upon Tyne NE1 7RU

A path to a globally successful marine energy industry

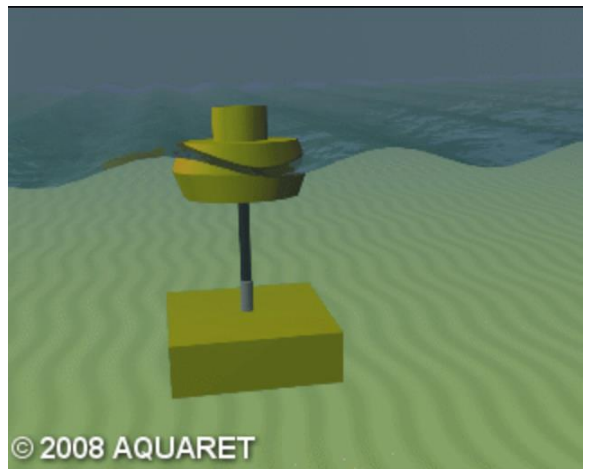

The European Marine Energy Centre, based in Orkney, has been operational for over 15 years. As a full scale, grid connected, marine energy converter test site, it has witnessed numerous prototype testing.

This presentation will cover some of the historic testing at EMEC, present testing and a look to the future. The presentation will also look at the wider wave & tidal industry and opportunities for the supply chain that may come about.

Jonathan Lindsay

Jonathan Lindsay is currently working at the European Marine Energy Centre (EMEC) in Orkney as Operations and Technology Director. EMEC is a marine renewable energy test centre and research organisation.

After completion of his PhD in Rock Mechanics at Strathclyde University, Jonathan took roles in a number of companies, starting in geotechnical engineering and then concentrating on operations management within offshore design and construction projects. Jonathan has been involved in Subsea Engineering since the early 1990's. Whilst his career was mostly spent in the Oil & Gas industry, more recently it has been spent in offshore renewables.

Registration Fees

SUT Members: £5
Non-Members: £7.50
Student Members: FREE
Payment online at www.sut.org/events
