Chair: **Darren Burbury**

The Early Careers Offshore Site Investigation Geoscience and Geotechnics (ECOSIGG) committee will be holding its inaugural event in London sharing industry and academic knowledge regarding the offshore renewable industry. The event will comprise a series of talks by industry experts and leading academics as follows:

- Integrating geoscience data to build effective ground models for large wind farm sites.

(Dr Mike Clare, National Oceanography Centre, Southampton)

- Detailed site investigation (SI) and advanced laboratory testing for state-of-the-art design methods.

(Dr Mike Rattley, Fugro)

- PISA design approach - challenges for application in design: Overview of the method, design applications in layered soils and calibration procedures for specific offshore sites.

(Prof. Harvey Burd, University of Oxford)

After the meeting there will be opportunities for discussions and networking to continue.
