**November 24, 2023**

## **Greetings!**

As we set our sights on 2024, the SUT Singapore Chapter is eager to share our upcoming activities calendar, extend our annual sponsorship request, and emphasize that the SUT operates as a non-profit volunteer organization. We welcome individuals interested in contributing to our committee and events.

Commencing the year, our Annual General Meeting in January marks an open-door event. Invitations will be dispatched in due course, providing members with an opportunity to voice their opinions and actively shape the local chapter's trajectory.

In a significant development, we are in the process of hiring our inaugural part-time staff member. This addition aims to assist in chapter development and alleviate administrative burdens on our volunteers, facilitating better organization and growth.

Outlined on our website, our exciting calendar for the year includes:

- April: Technical Evening
- August: Technical Evening
- December: End of Year Social

Our standard procedure involves sending invitations and subsequent reminders approximately one month before each event.

We are thrilled to introduce our new sponsorship program (attached). Sponsorship plays a crucial role in supporting our events and, in turn, aiding local underwater technology education programs such as the Singapore AUV Challenge, a collaborative effort by the Institute of Electrical Engineers (IEEE), Singapore Polytechnic, and the National University of Singapore (NUS).

We eagerly anticipate your response and look forward to your participation in this year's events.

**Sincerely,**

A handwritten signature in black ink, appearing to be 'James Christie', written over a light blue background.

**Mr. James Christie**  
**Chairperson**  
**SUT Singapore**

# ABOUT SUT

The Society for Underwater Technology (SUT) is a multidisciplinary learned society that brings together organisations and individuals with a common interest in underwater technology, ocean science and offshore engineering.

There are members from more than 40 countries, including engineers, scientists, other professionals and students working in these areas.

The SUT was founded to promote the further understanding of the underwater environment and to encourage:

- Cross-fertilisation and dissemination of ideas, experience and information between workers in academic research, applied research and technology, industry and government;
- Development of techniques and tools to explore, study and exploit the oceans;
- Proper economic and sociological usage of resources in and beneath the oceans;
- Further education of scientists and technologists to maintain high standards in marine science and technology.

# SUT SINGAPORE

The Singapore Branch, established in February 2015, has consistently thrived since its inception. Singapore SUT actively organizes various Technical and Networking events throughout the year. The primary goal is to present compelling technical subjects that contribute to the local subsea communities and facilitate regular industry networking opportunities in Singapore.
