- Attendance for one employee at all SUT events
- Small-size logo included at all SUT Singapore events, SUT Website and all Promotional Material including Social Media
- Company banner display and recognition at all Seminars, Social Events and SUT training courses

About SUT

The Society for Underwater Technology (SUT) is a multidisciplinary learned society that brings together organisations and individuals with a common interest in underwater technology, ocean science and offshore engineering.

There are members from more than 40 countries, including engineers, scientists, other professionals and students working in these areas.

The SUT was founded to promote the further understanding of the underwater environment and to encourage:

- Cross-fertilisation and dissemination of ideas, experience and information between workers in academic research, applied research and technology, industry and government;
- Development of techniques and tools to explore, study and exploit the oceans;
- Proper economic and sociological usage of resources in and beneath the oceans;
- Further education of scientists and technologists to maintain high standards in marine science and technology.

The Singapore Branch was created in February 2015 and has been going strong since.

Singapore SUT runs a number of Technical and Networking events throughout the year. The objective is to introduce interesting technical topics for the benefit of the local subsea communities and enable regular Industry networking events in Singapore.

EVENTS - 2020
