Volume 1

Session 1 - The Specifics of Glaucionitics

KEYNOTE 1 Geological and Geotechnical Challenges of the East Coast United States for Offshore Energy Transition ........ 82
Don DeGroot

An SBI-based Interbeddedness Index for the Prediction of Glaucionitic Materials for Offshore Geotechnics ................. 112
M Geyin, MM Madyarova, V Dantal, HM Kassa

A Novel Approach to Quantifying Glaucionite Content in Soils Using Digital Image Analysis ..................... 118
T King, T Wuensch, L Griffiths, A Fraps

Implications of Glaucionite Sands on US Offshore Wind Development .................................................. 124
Z Westgate, RD Beemer, DJ DeGroot

Monopile Installation in Glaucionitic Sands .................. 132
G Perikleous, S Meissl, AT Diaz, T Stergiou, A Ridgway-Hill

On the Stiffness Properties of the US Atlantic Outer Continent Shelf Fine-Grained Cohesive Sediments ............... 139
X Long, S Adhikari, J Fraser, D Hargrave

Invoking Carbonate Ramp Theory for Insights Into US South-Atlantic Margin Carbonate Sediment Behavior .......... 147
D Zeppilli, R Beemer, B Turner, Z Westgate

Interface Friction Angle of Glaucionitic Sands for Pile Design ............................................................. 155
VS Quinteros, Z Westgate, K Vinck, V Dantal, A Lindtorp, MA Toma

In-Situ Strength Profiling Micaceous Sands for Offshore Foundation Design ........................................... 162
A Shajarati, P Knight

Application of Magnetic Resonance in Geotechnical Site Investigations .................................................. 170
NCH van Gilse, R Soage Santos, LTP Meireles

Offshore Geotechnical Site Characterization of Silty Soils: a Novel Database ............................................. 178
C Bilici, P Carotenuto, T Lunne, AH Augustesen, L Krogh, H Dias, MC Sougle, A Barwise, S de Wit, D Burbury,
A Dalsgaard Petersen, N Adams

Correlation Between CPT Data and Shear Wave Velocity From Seismic CPTs and Borehole Geophysical Logging in Dense Sands of the German Bight ................................................ 184
A Janzen, J Sorgatz, M Kidane, U Tzschach
Session 2 - Geology & Geohazards I

Innovation of Offshore Geoscience Codes & Standards to Meet the Energy Transition
Neil Morgan

Late Weichselian Deformation of Glaciomarine Clays in Hesselø Bay, Denmark
M van Cappelle, PM Schilder, S Bhattacharya, BB Klosowska, M Hafstra, G Scott, NH Witt

Quantitative Analysis Approach to Assess Variability in Seabed Conditions Across a Large Offshore Windfarm Site
J Charles, D Axtell, S Gourvenec

Development of a GIS Project for Screening of a Prospective Offshore Wind License Area Using Public Domain Data Sources
J Tatum, AW Hill

A Multi-Criteria Evaluation Framework for Gas Extractability of Marine Hydrate Reservoirs
X Feng, F Liu, JH Geng

Geodata Acquisition by Magnetic Resonance Measurements in Offshore Boreholes
P Maas, J Burgers, J Peuchen, M Vrolijk

Probabilistic Fault Displacement Hazard in a Salt Tectonic Environment: an Innovative Approach
E Fiorini, G Imitazione, A Murianni, F Nurminen, S Unterseh, W Johnson

Geospatial Assessment of Future Floating Offshore Wind Challenges: UK Case Study Exploring Drag Anchor Suitability and Requirements
H Putuhena, DJ White, SM Gourvenec, F Sturt

Study on the Capillary Water Barrier Effect of Organosilicon on Red-Bed Mudstone
YQ Zhou, XB Chen, ZS Yu, JS Zhang, ML Wu

Do You Trust Your Geospatial Data? Using the GIGS Open-source Geodetic Testing Toolkit to Verify the Integrity of Your Geoscience Software
J Townsend, RJ Wylde

Soil Spatial Variability at Monopile Scale
J Peuchen, M Murali, C Modenesi, P Lebbink

Session 3 - In-Situ Penetration Testing

Calibration of Cone Resistance in a Sand With Fines by Means of Model Testing
V Fioravante, D Giretti, Y Teng, P Carotenuto, C Bilici, T Lunne, AH Augustesen, I Krogh, H Dias, MC Sougle, A Barwise, S de Wit, D Burbury, A Dalsgaard Petersen, N Adams

A PCPT-Based Method for Assessing the Quality of Fine-grained Soil Samples
N Ramsey, KK Tho

Study of Partial Drainage Effects in a Natural Silty Deposit Using Variable Rate CPTU Testing
P Carotenuto, C Bilici, T Lunne, AH Augustesen, I Krogh, H Dias, MC Sougle, A Barwise, S de Wit, D Burbury, A Dalsgaard Petersen, N Adams

A Critical Appraisal of Methods for and Obstacles to Obtaining, Processing, and Interpreting Useful Data From Offshore Seismic Cone Penetration Testing
TA Masters, T Czech, C Sullivan, C Cambeilh, G Verbeek

Assessment of Seismic Cone Penetration Tests Uncertainty: Equipment Set-up, Processing, and Interpretation Workflows
R Soage Santos, G Sauvin, J Park, M Vanneste

Calibrating Site-Specific Vs Correlations in Clay and Sand for Two Offshore Wind Farms
Y Teng, VM Meyer, RT Klinkvort, T Lunne, L Cafieri, M Rose

Synthesis of a Robust Yet Easy to Implement Method for Site-Specific Correlation Between Offshore Piezocone Penetration Test Data and Shear Wave Velocity
E Fitzpatrick, TA Masters, R Soage Santos
Enhancement of the Seafloor CPT – a Solution to Acquire Improved in Situ Data Earlier, Faster and Greener ........................................ 344
O Koreta, R Soage Santos, L Krogh, K Lundvig, S Botker-Rasmussen, M Hoffmann

Comparative Assessment of Differing In-Situ Degradation Behaviour in Offshore Silt and Sand Soils Using Cyclic and Dual Sleeve Piezocone Penetration Tests ......................................................... 352
C Brandish-Lowe, TA Masters, A Shonberg, M Harte

The FFCPT - an Innovative and Cost-effective Option for Supplementary Offshore Windfarm Reconnaissance Data Acquisition ................................................................. 360
HA Christian, DE Heffler, D Donaghy, JJ Osborne

Motivation and Demonstration of Robotic Tooling for Ground Characterization: the ROBOCONE ................................................................. 368
J Creasey, AE Hajjar, AT Conn, E Ibream, AH Bateman, G Mylonakis, G Martin, A Diambra, BPI Cerfontaine, SM Gourvenec, DJ White, D Igoe, SS Kasyap

A Framework for Specifying Prior Distributions for the Parameters of CPT-based Empirical Equations ................................................................. 376
Y Feng, N Bozorgzadeh, P Suzuki, RT Klinkvort

How Many CPTs Does It Take to Make a Synthetic CPT? .................................................................................. 385
M Vardy, G Sauvin, M Vanneste, RT Klinkvort, NJ Dyer

Effect of CPT Profile Resolution on Minimum Required Size of Monopile for Ultimate Limit State Design ................................................................. 393
C Anastassopoulos, JA Charles, S Gourvenec

Session 4 - Advances in Soil Characterisation

Satoshi Nishimura

Dynamic Image Analysis of Coarse Soil in an Offshore Geotechnical Laboratory .................................................................................. 410
E Schoute, J Peuchen

Potential Sources of Uncertainty in the Thermal Conductivity Needle Probe Laboratory Test ................................................................................ 417
G Tucker, Y De Giacomo, C Gerlach, CT Leth

Combined Electrical Resistivity-Shear Wave Velocity-Based Characterisation of a Sand .................................................................................. 425
A Sadrekarimi, R Ganguly

Impact of Specimen Height on Bender Element Testing of Dense Sand .................................................................................. 433
AH Augustesen, L Krogh, P Carotenuto, Y Suzuki, R Dyvik

Interface Direct Shear Test Simulating Post-Grouting Pile Installation With Novel Binders ................................................................................ 441
A Botero, E Romero, M Arroyo, F Sossa, G Spagnoli, G Tintelnot

Triaxial Set-Up and Procedure to Investigate the Shear Strength of Gassy Sediment .................................................................................. 447
P Kaminski, J Grabe

Examination of Critical State Parameters for Sands .................................................................................. 453
S Sharma, H Zhou

Improving the Quality of Geotechnical Datasets: A Rule-Based Approach .................................................................................. 461
A Senanayake, X Peng, E Lewis

Session 5 - Mechanical Protection of Seabed Infrastructure I

Cable Integrity Risk Assessment (CIRA) .................................................................................. 468
L Burley, VA Terente, LJ Hewitson, HJM Stuart

In-Situ Testing in Trench Backfill: Evidence of Evolving Backfill Density .................................................................................. 476
T Powell, DJ White, F Alvarez-Borges, M Fearn

Capturing the Effects of Remedial Trenching Through Acoustic Imaging .................................................................................. 484
M Noel, S Griffiths, JY Guigné
Vessel Fuel Consumption - A Comparative Case Study for Offshore Product Protection Methods ........................................ 492
L Morrice, N Hamdan, TA Powell

Use of Pipe-Seabed Observations Directly in PSI Analyses ................................................................. 500
A Borges Rodriguez, R Riera, C Colreavy, M Selby, M Davis, A Rathbone

Up-Lift Resistance of Pipelines Within a Rock Berm .............................................................. 508
AJ Macconochie

Development of a Vertical Embedded Plate Anchor (VEPLA) for Pipeline Restraint .......................................................... 516
P Allan, D Bruton, MJ Brown, Y Sharif

A Numerical Study on the Feasibility of a Cable and Pipeline Decommissioning Device .................................................. 524
M Martinelli, F Pisanò, D Korndorffer

Sea Ice Risk Assessment in Cable and Pipeline Engineering .......................................................... 532
PG Allan, J Hunt, P Syrda

Quantification of Rockfall Risk for Submarine Pipelines and Umbilical Lines .......................................................... 540
L Ottonello, G Malgesini, R Bernetti, R Argiolas, C Chisari

Near Surface Sub-Seabed Boulder Detection Using a 3D Acoustic Profiler .................................................. 548
J Pittman, S Griffiths, JY Guigné

Characterisation of Anchor Penetration Behaviour for Cable Burial Risk Assessment .................................................. 555

Operational Integrity of Pipelines on Mobile Seabeds: Using Survey Data to Explore Trends of Changing Pipeline Embedment and Span Evolution .......................................................... 563
Z Hou, MF Bransby, PG Watson, DJ White, HE Low, A Rathbone

Session 6 - Laterally Loaded Piles

KEYNOTE 4 Large-Scale Pile Testing Research to Advance Offshore Pile Design .................................................. 572
Roisin Buckley

Medium-Scale Field Testing of Laterally Loaded Monopiles in Glacial Till at Cowden .................................................. 595
S Martin, BW Byrne, RM Buckley, K Wu, RA McAdam, A Aghakouchak, S Turner, A Cameron, R Lindeboom

A Novel Apparatus for Lateral Load Testing Miniature Pile Segments .................................................. 603
S Malhotra, BW Byrne

New Method to Determine p-y Curves From Centrifuge Testing of Monopile Laterally Loaded Monopiles .................................................. 611
M Blanc, L Thorel, S Maatouk

Simplified Analytical “m-θ” Curves for Predicting Nonlinear Lateral Pile Response .................................................. 618
AH Bateman, G Mylonakis, JJ Crispin

Derivation of Simplified p-y Curves for Design of Drilled and Grouted Monopiles in Rock Formations .................................................. 626
L Berenguer Todo Bom, M Delle

Session 7 - Mechanical Protection of Seabed Infrastructure II

Glacial Hazard Detection Using 3D UHR Seismic Data; the Clair Experience .................................................. 636
DR Cox, G Wood, M Higson

Sorted Bedforms Implications for Offshore Renewable Infrastructure .................................................. 643
J Dix, R Riera, P Dimmock, A Barwise, L Arlott

Operation of Tracked Trenchers on Very Soft Clay Seabeds .................................................. 651
P Allan

Influence of Multi-Segment Anchor Chains on Potential Seabed Trench Profile Near the Anchor .................................................. 658
S Rui, Z Zhou, HP Jostad, Z Guo, L Wang, L Teng
### Volume 2

An Integrated Geological and Geophysical Approach to De-risking the Siting and Operation of an Inter-continental Subsea HVDC Cable; a Case Study From the Marinus Link Project, Bass Strait, Offshore Southern Australia. C Rouse, E Fountain, R Moore, P Fish, C Jackson, RG Hunt

The Past is Key to the Present? The Integration of Legacy O&G Data Into Ground Models. D Morgan

Geological, Geophysical, and Mechanical Identification of Marine Deposits From the Gulf of Finland. ZS Li, D Mohapatra, W Solowski, M Saresma, J Virtasalo, R Khalili

Tunnel Valleys as Geohazards: New Insights From High-Resolution 3D Seismic Data. JD Kirkham, KA Hogan, RD Larter, E Self, K Games, M Huuse, MA Stewart, D Ottesen, NS Arnold, JA Dowdeswell

Capacities of Tetrapod Bucket Foundations in Clay Under Combined Horizontal-Moment Loading. NK Singam, S Chatterjee

Experimental Study on Formation and Decomposition Characteristics of Tetrahydrofuran and Methane Hydrate Based on Microfluidic Chip Technology. J Yang, Y Wang

Constitutive Modelling of Overconsolidated Gassy Clay. H Cai, Z Ghao, Y Hong, J Zhang, D Lu

The Influences of Drilling Parameters on the Rate of Penetration for Rock Rotary-Percussive Drilling Process. Q Shen, Y-R Liu, Y-J Wang, R-L Cao

Experimental Study to Investigate the Shear Deformation of Sand under Constant Normal Stiffness Conditions. M Khan, MR Bulley, P Dera

Session 10 - Pile Design

KEYNOTE 6 Geotechnical Centrifuge Modelling and the Energy Transition - ‘Same Old Same Old’ or Are There More Foundation Challenges on the Horizon? Phil Watson

A Load-Transfer Curve Formulation to Predict the Drained Response of Offshore Piles to Pull-Out. G Orlando, L Govoni, R Zabatta, A Foglia

Three-Dimensional DEM Simulation of Plugging Behaviour of Small-Diameter Open-Ended Model Piles Penetrating Into Sand. M Sun, ZX Yang, N Guo, RJ Jardine

Divergence Between CPT-Based Method Predictions for the Axial Capacities of Large Offshore Piles Driven in Sand. R Scarfone, FC Schroeder, R Silvano, D Cathie, RJ Jardine

Ageing of Pile Shaft Friction in Medium Plasticity Clay. Z Hou, BM Lehane, PG Watson
Centrifuge and DEM Modelling of Helical Piles for Offshore Jacket Foundations in Sand .......................... 1000
B Cerfontaine, MJ Brown, M Huisman, M Ottolini

Accounting for Nonlinear Foundation Behavior in Offshore Wind Found Analysis: a Case Study of Hybrid Monopile Foundations .......................................................... 1008
YS Shin, N Sivasithamparam, J Park, J Kim, Y Jeong, H-S Choi

Soil Uncertainty Propagation for Offshore Wind Turbine Monopile Design ................................. 1014
A Lovera, M Dong, I Funes Macarro

Rate Effects Increasing Lateral Capacity of Monopiles ................................................................. 1022
MM Wahl, L Hamre, GR Eiksund, TI Tjelta, P Suzuki, M Rose

Monopile Lateral Loading in Dense Sand - Comparison Between Monopile Hammered in Centrifuge Versus PISA Design Model ...................................................... 1031
M Blanc, L Thorel, S Maatouk

Exploring Rate Effects for Monopiles Installed in Silty Sand .......................................................... 1037
TA Nguyen, P Watson, MF Bransby, C Erbrich, A Shonberg

Experimental and Numerical Study on the Capacity of a Winged Monopile ................................. 1043
J Yu, Z Wang, M Huang, B Wang, K Shen

Session 11 - Cyclic & Seismic Behaviour with Lab Testing

Efficient Modelling of Cyclic Degradation in Monopile Design .................................................. 1050
R Ragni, N Sivasithamparam, HP Jostad, Y Zhang, T Okuno, H Sugiyama, K Fukutake

Cyclic Loading of OWT Foundations: Current Practice and State-of-the-Art .................................. 1057
Y Zhang, PG Watson, H Sturm, R Klinkvort, C Erbrich, S Lam, A Shonberg, A Hall

Coupled Simulations of a Monitored Wind Turbine Monopile Subject to Lateral Loading ............ 1067
A Kheffache, B Stuyts, C Sastre Jurado, W Weijtjens, C Devriendt

A Tool for Drawing Cyclic Contour Diagrams for Offshore Foundation Design ......................... 1075
S Yang, J Liu, KH Andersen

Monopile-Sand Interaction Under Lateral Cyclic Loading: Simulation of Centrifuge Test Data Using a Cyclic 1D p-y Model .......................................................... 1083
E Kementzetzidis, H Wang, M Marino, A Askarinejad, A Peccin da Silva, AS Elkadi, F Pisanò

Overview of a New Cyclic Methodology for the Geotechnical Design of Monopiles Supporting Offshore Wind Turbines in Sand ..................................................... 1091
LM Lapastoure, D Igoe, A Diambra, I Thusyanthan, S Jalilvand

Cyclic Characterisation of Low-to-Medium Density Chalk for Offshore Driven Pile Design ........ 1098
T Liu, R Ahmadi-Naghadeh, RM Buckley, RA McAdam, RJ Jadrine, K Vinck, S Kontoe, BW Byrne

Predicting Normalized Shear Modulus and Material Damping Ratio Curves of Marine Clays ....... 1106
V Taboada, SC Cao, D Cruz Roque, P Barrera Nabor, F Flores Lopez

Seismic Response of Large Diameter Monopiles for Offshore Wind Turbines in Liquefiable Soils .......................................................... 1114
C Español-Espinel, SPG Madabhushi, SK Haigh, CN Abadie, DM Xu, JE Go, PRJ Morrison

Design of Monopile Foundations for 10-15MW Offshore Wind Turbines in Seismically Active Regions in East Asia .......................................................... 1122
B Yin, H Tang, J Yiu, Y Shirai, J Sasaki, AS Hokmabadi

Simplified Methods for Seismic Design of Monopile-Supported Offshore Wind Turbines .............. 1130
D Gallese, J Go, AS Hokmabadi, HT Tsang, J Sasaki, Y Shirai, T Miyoshi, A Hisamatsu, M Yoshida, N Miura

Seismic Modelling of Foundations Supporting Wind Turbines in Liquefiable Soils ................. 1138
S Lam, C Erbrich, KK Lee

Shear Behavior and Property of Planar Joints Under Different Pore Pressure Conditions ............ 1146
K Zhang, Y Liu, QC Lyu, L Zhu
A Simplified Procedure for Seismic Response Spectrum Analysis of Offshore Caisson Foundations
A Løekke, B Carlton, S Feizi, S Safinus, A Anodio, A Rahim

Seismic Soil-Monopile-Structure Interaction for Offshore Wind Turbines: From 3D to 1D Modelling
D Delavinia, E Kementzetzidis, S Panagoulias, A Tsouvalas, F Pisanò

Seismic Fragility Analysis of Jacket Supported Offshore Wind Turbine Considering Ground Motion Directionality
U Nath, S Halder

Comparison of Soil Damping Methods for Offshore Wind Turbines
S Panagoulias, A Nernheim, P Voges-Espelage

Session 12 - Anchoring of Floating Systems

KEYNOTE 7 On the Numerical Modelling of Floating Offshore Wind Foundations
Lidija Zdravkovic

Design Benefits for Plate Anchors for Floating Offshore Wind Through Coupling Floater, Mooring, and Geotechnical Responses
K Kwa, O Festa, DJ White, S Gourvenec, A Sobey

The Effect of Strain Softening on the Development of Anchor Chain Trenching
C Sun, N Boylan, Y Wang, MJ Cassidy

Integrated Responses of Mooring Line-Anchor System Subjected to Environmental Loads
W Liu, R Tu, Y Tian, MJ Cassidy

The Influence of the Installation Advancement Ratio on the Cyclic Performance of a Single-Helix Pile for Floating Offshore Wind Applications
W Wang, MJ Brown, YU Sharif, C Davidson

Set-Up Effects of Dynamically Installed Anchors
H Sturm, DL Pradhan

Impact of Anchor Type Distribution on Anchor Hazard Assessment
HJ Luger

Out of Plane Loading of Drag Embedment Anchors for Floating Renewable Energy Technologies
C Davidson, A Brennan, M Brown, L Inglis, S Vasudevan

Broadening the Use of SEPLAs for Floating Wind Applications
Anchoring in Non-Clay Soils - MP O'Neill, C O'loughlin, PG Watson, C Gaudin, M Palacios, J Stubbs, M Kuo

The Influence of Ground Conditions on the Performance of Shared Anchor Systems for Floating Offshore Wind
H Dingle, T Gordelier, AC Pillai

Session 13 - Foundation Research

Driven Pile Behaviour in Low-to-Medium Density Chalk: the ALPACA JIP Outcomes
R Jardine, T Liu, S Kontoe, F Schranze, RM Buckley, BW Byrne, RA McAdam, K Vinck

A New Load Transfer Model for Axially Loaded Piles Driven in Chalk
K Wen, S Kontoe, R Jardine, T Liu

The Effects of Steel Corrosion on the Interface Shearing Behaviour of Chalk
K Vinck, RJ Jardine, A Willow, T Liu, BW Byrne

P-y Response in Porous Rock: Numerical Derivation With Experimental Validation
T Riccio, M Previtali, MO Ciantia, MJ Brown

Evaluation of p-y Model for Laterally Loaded Piles in Normally Consolidated Soil
O Komolafe, CP Aubeny
An Automated Approach to Derive Pile p-y Curves From Bending Moment Data ........................................... 1206
M Guevara, J Doherty, P Watson

Impact of Soil-Conductor p-y Curves on Fatigue Life Assessment of Offshore Drilling Systems ..................... 1312
M Guevara, J Doherty, P Watson, V Gomes, A Mootz, D White

Assessment of p-y Approaches to Estimate the Lateral Response of Driven and Vibrated Piles in Sand .......... 1321
H Wang, BM Lehane

Effect of Installation Mode, Pile Shape and Cycling on the Ageing of Shaft Friction of Mild Steel Piles .......... 1328
E Bittar, B Lehane, P Watson, A Shonberg, A Deeks

Analysing Monopile Response With a Critical State Model for Sands ......................................................... 1336
E Castillo-Fuentes, L Zdravkovic, DM Potts

Finite Element Modelling of Long-Term Cyclic Response of Monopiles in Sand Using a Stiffness Degradation Approach .......................................................... 1342
Z Gao, S Whyte

Evaluation of Stress-Induced Anisotropy Effects on Undrained Monotonic Capacity of Suction Bucket Foundations in Cohesionless Soils Using Ta-Ger Constitutive Model ......................................................... 1350
P Tasiopoulou, Y Chaloulos, C Tsifis, A Giannakou, J Chacko, M Harte, T Balaam

Numerical Study of the Lateral Response of Offshore Rock Anchors ......................................................... 1357
A Genco, MO Ciantia, M Brown, M Previtali, A Ivanovic, N Cresswell

Session 14 - Geophysical Site Investigation

KEYNOTE 8 The Geotechnical Challenges Associated with Carbon Capture and Storage (CCS) ................. 1364
Ann Muggeridge

Seismic Resolution as Key to De-Risking Shallow Foundation Hazards: A Hesselø Case Study .................. 1377
S Bhattacharya, M van Cappelle, B McGunnigle, P Burn, M Hofstra, NH Witt

Merging Individual Acoustic Corer™ Data Sets Into a Unified Volume to Optimize the Identification and Interpretation of Geohazards, Obstructions, and Stratigraphy: Case Studies From the Baltic Sea and Gulf of Mexico ........... 1382
S Abbott, M Kotsi, R Laidley, CA Kilic, JY Guigne

Quantifying the Reduction of Ground Modelling Uncertainty Achieved Though Seismic Data Re-Processing and Re-Interpretation ......................................................... 1389
B Kurjanski, J Geear, C McGhee, E Henden, K Overy, A Hart, P Cox, G Hulks, Z Ostapiuk

Quantitative Analysis of Seismic Amplitude Anomalies in Hollandse Kust West and Implications for Foundation Design ......................................................... 1398
C Clay, TK Henstock, ME Vardy

Predicting Select Geotechnical Sediment Properties at a Carbonate Site Through Inversion of 2D Post-Stack Multichannel Seismic Data ......................................................... 1406
A Osuchowski, MF Bransby, PG Watson, E Dalgaard, R Ross

Session 15 - Seabed Stabilisation & Advanced Laboratory Testing

Characterization of Small-Strain Shear Modulus Through DAS .............................................................. 1416
C Callens, B Stuyts, T Lanckriet, E Williams

Obtaining Representative Stiffness Degradation Parameters From the Resonant Column .......................... 1422
K Wen, RM Buckley, BW Byrne

A New Procedure for Measuring Shear Modulus Reduction in the Intermediate Strain Range .................... 1429
P Carotenuto, H Smith, Ø Blaker, AH Augustesen, L Krough

Multidirectional Cyclic Simple Shear Testing of an Overconsolidated Glacial Till ..................................... 1437
Z Qiu, BW Byrne, CM Martin
Laboratory Investigation on the Potential of Utilising Pushed-in Samples to Obtain Representative Coarse-Grained Offshore Samples for Static Strength Tests .......................................................... M Al-Maadheedi, SA Schmieder, B Mackenzie, M Bean, T Carrington, A Lowther, M Soares, D Burbury

Effect of Rock Density on the Response of Scour Protection to Earthquake-Induced Liquefaction for Offshore Wind Applications ......................................................... D Xu, SPG Madabhushi, CN Abadie, JM Harris, RJS Whitehouse

Advanced Rock Berm Design in Iceberg Plough Marks for Pipeline Support ......................................................... C Olsen, MR Lodahl, A Kristoffersen

Automation of Slope Stability and Rockberm Support Design ............................................................ D Kay, S Panayides

Submarine Landslide Stability and Rockberm Support Design ............................................................ C Olsen, MR Lodahl, A Kristoffersen

Bayesian Strain-Rate Correction Applied to Dynamic CPTu Data ............................................................. S Collico, M Arroyo

Experimental Investigation on the Performance of Tolerably Mobile Subsea Foundations With Varied Interface Conditions .......................................................... J Liu, X Zhang, X Feng, C Han

Climate Change Effects on the Design of Spar Floating Offshore Wind Turbines ........................................... M James, S Haldar, S Bhattacharya

Foundation Response of a Jacked-Up Vessel Upon Earthquake-Induced Subsoil Liquefaction ..................... D Bertalot, L Ottonello, S Brinkman, D Soler

Spudcan Penetration Assessment Using LDFEA and Comparison With Field Observations ....................... H Falepin, R Wallerand

Capacity of Dynamically Installed Multi-Line Anchor Under Combined Loading in Spatially Variable Undrained Soils .................. P Yi, XS Guo, J Liu

Non-Vertical Spudcan Impacts on a Dense Sandy Seabed: Improving Design Through Centrifuge Modelling. ............ C O’Beirne, MF Randolph, B Bienen, SH Chow

Analysis of Stress Variation Around Spudcan Subjected to Cyclic Loading .................................................... R Ragni, A Amodio, H Zhou

Modelling the Generation of Cyclically-Induced Excess Pore Pressures Below a GBF ............................... P Meijers, AS Elkadi

Session 16 - Shallow, Anchored & Jack-Up Foundations

Key Considerations for Designing Mudmat Foundations According to ISO 19901-4 ........................................ C Casanovas, N Morgan, F Ciavaglia

Performance-Based Design of Sliding Mudmat Foundations - Geotechnical and Practical Focus ...................... H Zhou, H Krisdani, R Ragni, C Sun, H Dias, CW Clemente

Bayesian Strain-Rate Correction Applied to Dynamic CPTu Data ............................................................. S Collico, M Arroyo

Experimental Investigation on the Performance of Tolerably Mobile Subsea Foundations With Varied Interface Conditions .............. J Liu, X Zhang, X Feng, C Han

Climate Change Effects on the Design of Spar Floating Offshore Wind Turbines ........................................... M James, S Haldar, S Bhattacharya

Foundation Response of a Jacked-Up Vessel Upon Earthquake-Induced Subsoil Liquefaction ..................... D Bertalot, L Ottonello, S Brinkman, D Soler

Spudcan Penetration Assessment Using LDFEA and Comparison With Field Observations ....................... H Falepin, R Wallerand

Capacity of Dynamically Installed Multi-Line Anchor Under Combined Loading in Spatially Variable Undrained Soils .................. P Yi, XS Guo, J Liu

Non-Vertical Spudcan Impacts on a Dense Sandy Seabed: Improving Design Through Centrifuge Modelling. ............ C O’Beirne, MF Randolph, B Bienen, SH Chow

Analysis of Stress Variation Around Spudcan Subjected to Cyclic Loading .................................................... R Ragni, A Amodio, H Zhou

Modelling the Generation of Cyclically-Induced Excess Pore Pressures Below a GBF ............................... P Meijers, AS Elkadi

Session 17 - Pile Design II

Numerical Investigation of Horizontal Plate Anchor Capacity in Dilating Sand ............................................. Z Liu, SH Chow, X Wu, M Ghafoor, Y Tian

3D Rate-Dependant Resistance of a Suction Caisson in Cohesionless Soils .............................................. 1765
C Olsen, N Hamdan

The Effect of Two-Way Pressure Cyclic Installation on the Tensile Capacity of Suction Caissons in Sand - Part III .... 1773
C O’Loughlin, BM Lehane, S Mani, B Bienen, N Hamdan, TA Powell

On the Behavior of Suction Caissons Under Cyclic Axial Loading ......................................................... 1781
I Sanders, M Achmus

The Tension Capacity of Suction Bucket Foundations in Sand – A Centrifuge Experimental Study .................. 1789
HE Low, S Ingarfield, CT Erbrich, PG Watson, MF Bransby, CD O’Loughlin

3D Numerical Simulations of Centrifuge Tests Measuring Suction Bucket Capacity in Sand Under Different Pullout Rates ... 1797
YK Chaloulos, P Tasiopoulou, A Giannakou, J Chacko

Time-History Effective-Stress Analyses of OWT Suction Bucket Foundation in Sand Under Sustained Tension Typhoon Loading .............................................................. 1805
P Tasiopoulou, T Limniaiou, Y Chaloulos, A Giannakou, J Chacko

Load-Time Failure Envelopes for Suction Caissons Under Sustained Vertical Loading ................................ 1813
A Rosati, A Desideri, S Rampello, MF Randolph, C Gaudin

Evaluation of Multi-Directional Lateral Capacity and Stiffness Characteristics of Suction Caisson in Undrained Clays .... 1821
Z Shi, H Cui, J Liu, M Huang

Session 19 - Foundation Performance and Ground Characterisation

Investigating Installation and Post-Installation Performance of Vibro-Driven Monopiles in Sand: Centrifuge Modelling and Numerical Analysis .............................................................. 1830
B Bienen, J Hein Mazutti, MF Bransby, P Kazemi Esfeh, MF Randolph

Effect of Installation Parameters and Initial Soil Density on the Lateral Response of Vibratory-Driven Monopiles: A Laboratory Study .............................................................. 1838
A Peccin da Silva, M Post, ASK Elkadi, E Kementzetzidis, F Pisanò

Prediction and Back-Analysis of Centrifuge Lateral Pile Load Tests in Fine-Grained Soil .......................... 1847
Y Zhang, P Gaunt, AS Gundersen, N Sivasithamparam, HK Engin

Effects of Partial Vibratory Driving on the Monopiles Lateral Stiffness - A Geomechanical Evaluation .......... 1855
J Fischer, J Dührkop, B Bienen

Vibro-Driveability of Monopiles Using Hypervib and GRLWEAP Approaches ........................................... 1863
I El Haffar, JC Ballard, M Maron, A Holeyman, G Perikleous

Quantifying the Vibro-Driveability of Monopiles in Sand: Prediction V. Experimental Results ................ 1871
I El Haffar, JC Ballard, A Holeyman, J Hein Mazutti, B Bienen, MF Randolph, MF Bransby

Medusa DMT for Geotechnical and Geophysical Offshore Testing ......................................................... 1877
D Marchetti, M Sacchetto

Potential of the Medusa DMT for Offshore Geotechnical Investigation ...................................................... 1889
P Monaco, A Chiaradonna, D Marchetti, S Amoroso, JS L-Heureux, TMH Li

Monotonic Characterisation of Low-to-Medium-Density Chalk for Driven Offshore Pile Design ................. 1897
K Vinck, RJ Jardine, RM Buckley, RA McAdam, T Liu, S Kontoe, BW Byrne, P Ferreira, M Coop

Effect of Shallow Failure Mechanism on Interpretation of Ball Penetration Test in Non-Homogeneous Clay 1905
C Han, Q Zhang, J Liu

In Situ Free-Fall Cone Penetrometer (FF-CPT) and Laboratory Fall Cone Characterisation of Soft Marine Sediments in the Gulf of Finland, Baltic Sea ......................................................... 1911
M Saresma, JJ Virtasalo, ZS Li, D Mohapatra, W Sołowski

Site Characterisation Data Management, Computational Techniques and the Use of AGS Data .................. 1919
AD Patel, D Shrimal, N Pickard
Data Integration Tailored to Assess Spatial Variability for Jack-Up Clearance Zone Assessment – Application to Offshore Renewables .......................................................... 1925
M Vanneste, CS Forsberg, RT Kinkvort, Z Westgate, CF Forsberg, T Watton, HM Kassa, J Skot-Hansen

A Novel Plastic Foundation Type for Tolerably Mobile Structures ...................................................... 1933
T Powell, S Panayides

Whole-Life Design Applied to Pipeline Bundle Towhead Foundation System ........................................ 1940
S Panayides, TA Powell, DJ White, SM Gourvenec

Optimisation of Rock Berm Shapes for Pipeline Protection ................................................................. 1948
A Maconochie

Effect of Steel Type on Friction Developed on Driven Piles in Sands .................................................. 1955
E Bittar, BM Lehane, P Watson, A Shonberg, A Deeks

Improving Driveability Predictions for Offshore Piles Using Bayesian Optimisation .......................... 1962
R Buckley, YM Chen, BB Sheil, SK Suryasentana, MF Randolph, JP Doherty

Session 20 - Applications for Artificial Intelligence

KEYNOTE 10 Applications of Data Science in Offshore Geotechnical Engineering: State of Practice and Future Perspectives . . . 1972
Bruno Stuyts

A Novel Approach to Geohazard Data Interpretation Leveraging Data-Centric AI ................................. 1994
A Tustin, K St Clair, S Miller, P Endresen, J Chenin

Prediction of Submarine Turbidity Currents Using Stacked LSTMs with Tree-Structured Parzen Estimator Optimisation. . . . . 2004
F Fazel Mojtahedi, N Yousefpour, SH Chow, M Cassidy

Capturing Uncertainty in Quantitative Ground Models ........................................................................ 2012
M Vardy, G Sauvin, RT Klinkvort, M Vanneste, A Kort, CF Forsberg

Demystifying the Connections Between Gaussian Process Regression and Kriging Theories .............. 2020
S Suryasentana, BB Sheil

An Application of Machine Learning to the Back Analysis of Monopile Response ............................ 2028
AI Pirrone, DMG Taborda

Application of the Neural Network Model in Predicting the Three-Dimensional Response of Suction Caissons on Clay . . . . 2036
X Yin, H Wang, F Pisano, K Gavin, A Askarinejad, H Zhou

Interpreting Interface Shear Strength Parameters for Pipe-Soil Interaction Analysis Using Bayesian Inference. . . . . 2044
R Das, ZJ Westgate

 Artificial Intelligence (AI) Driven 3D Point Scanner for Monitoring Soil Plug Hazards During the Installation of Suction Caisson Foundations ................................................................. 2052
B Williams, S Suryasentana, M Perry, K Donaldson

Session 21 - Project & Design Case Studies I

Desktop Study as a Basis for Geo-Engineering Success ........................................................................ 2062
PS Dimmock, R Riera, TA Tam, N Boylan

Geohazard or Geo-Engineering Constraint? ...................................................................................... 2067
PS Dimmock, R Riera, TA Tam, N Boylan

IJmuiden Ver Windfarm Zone: Increasing the Resolution of the Southern North Sea Stratigraphy Using Iterative Ground Modelling Techniques ......................................................... 2072
H Eady, C Bloore, D Gerritsma

High-Level Engineering Considerations for the Concept Selection of Fixed Offshore Wind Turbine Foundations .............................. 2080
F Ciavaglia, N Morgan, C Casanovas
Ground Model Review From Downhole Surveys of Rock Sockets at St Brieuc Offshore Windfarm ............................... 2088
A Bertossa, C Tam, J Geear, A Hart, R McLean, J Petel

Depth of Lowering and Layered Soils; A Case Study From Across the North Sea. .................................................. 2096

Identifying Top Bedrock and Geotechnical Zonation for Cable Route Surveys: A Case Study From Eastern Link 1 Marine Survey ................................. 2104
C BLoore, S Rice

Innovative Technologies for Offshore Oil and Gas Industry: a Brief Review of Survey, Monitoring and Inspection
Methods for Energy Transition .................................................. 2112
GN Hariharan

A Method for Predicting the Drilling Rate of Penetration for Pile Foundations Installed Into Rock. ............................. 2121
L Jones, R Mclean, L Costa

Unlocking the Shallow Overburden Understanding of Ubadari Gas Field in Indonesia Using High-Resolution
Shallow Datasets ........................................................................ 2129
SA Putri, I Panggelen, M Nauw, A Maulana, L Bachtiar, CS Birt, H Galanes-Alvarez

Impact of Dumping Operations at a Canyon Head on Turbidity Current Geohazard: Insights from a Project Development . . 2137
M Bolla Pittaluga, G Porcile, L Durante, C Pirmez, G Malgesini, R Wallerand

Engineering Properties of a Stiff Bolders Bank Glacial Till from Cowden ................................................................. 2145
ER Ushev, T Liu, RJ Jardine

A Snapshot of the Offshore Geotechnical Engineering Profession .............................................................. 2153
A Page, P Watson, F Pisanò, B van Dijk, B Stuyts, J Parra, HK Engin

Session 22 - Project & Design Case Studies II

Advanced Broadband Processing of UHRS Data to Enhance Seismic Interpretation - Insights From a Baltic Sea
Offshore Windfarm ...................................................................... 2162
P Cox, R Ward, G Hulks, EK Mauritzen, A Fog, G Salain, P Salek

Slope Instability on the Egyptian Slope: Potential; Link to History (?) ................................................................. 2169
G Wood, G Hough, K Hampson, C Noll, AW Hill

Evaluation of Submarine Mass Movements in Sulafjorden, Norway ................................................................. 2181
B Carlton, P Fornes, RC Hansen, CS Forsberg, M Vanneste, F Løvholt, CF Forsberg

Rippled Scour Depressions on Dogger Bank (North Sea): Mapping, Quantification and Geohazard Implications
for Offshore Wind Farms .......................................................... 2189
R Riera, PS Dimmock, JK Dix, A Barwise, L Arlott

Integrated Hazard Assessment of Lake Tsunamis Triggered by Subaqueous and Subaerial Landslides ................. 2197
M Strupler, M Bürgler, DF Vetsch, K Kremer

Case Study: Offshore Windfarm Inner Array Cable Crossing Design in Dynamic Seabed Environments. ......... 2203
E Lee, RJS Whitehouse, AJ Couldrey

Penguins Anchor Piles - Driveability Back Analysis ........................................................................... 2211
P Dimmock, C Colreavy, S Chenicheri Pulukul, R van-Vliet

Back Analysis of PISA Pile Tests at Dunkirk Using a Practical Nor-Sand Model ........................................... 2218
M Selby, H Zhou, T Liu, N Boylan

Pile Setup in Sand: Analysis of the Large Diameter Pile Testing Data From Trans Tokyo Bay Highway ............ 2226
D Cathie, R Silvano, O Zarzouras, C Prearo, E Ozu, R Jardine

Application of Axial Load Tests in the Netherlands to Offshore Pile Design ........................................ 2234
K Duffy, KG Gavin, DA de Lange, M Korff
